

From our partners in cocoa bean processing Carle & Montanari we will exhibit the cocoa press.

## 卧式可可豆榨油机 POV 590/16 Horizontal Cocoa Press

In the case of cocoa liquor the capacity is about 5 pressings per hour, with indicative values shown in the following table:

		POV590 16
Efficiency [%]	效率	98
Productivity [kg/h]	产能	1,390
Cycles/hour approx.	速率 次/时	5

These productivity values are indicative, being subject to variations according to the characteristics of the cocoa liquor and the residual butter in the cake. In this regard, the values shown in the table are for a residual butter content of 10/12%.
